# Rapid Review Anesthesiology Oral Boards

## Synopsis

Written for trainees who are preparing to take the Anesthesia Oral Board exam, *Rapid Review Anesthesiology Oral Boards* is focused on the most commonly tested topics on the ABA oral board exam. Presented in a question-and-answer format, the book covers 39 different clinical scenarios encountered in the exam, including the Parkland formula to calculate fluid resuscitation in burn patients, ICP monitoring in craniotomy and hemodynamic goals in patients with cardiac disease. Questions follow the normal course of a case, from pre-operative assessment to intra-operative management and post-operative care. The answers to the questions are carefully structured to not only help the reader understand the medicine of anesthesia but also to provide the correct terminology needed to successfully pass the exam. This book is essential reading for trainees preparing for one of the toughest exams of their careers.

## Book Information

Paperback: 260 pages

Publisher: Cambridge University Press; 1 edition (October 28, 2013)

Language: English

## Customer Reviews

I liked that you could carry this book around from OR to OR. Not comprehensive but the answer and question format helps you prepare for oral boards. Had some nice pearls in and was an easy read. Would be a good supplement to a more comprehensive book like "knocking out the boards."

Really helpful for learning what to say and how to answer the questions. Having just taken and passed my boards, I can say that this book was a great resource for learning how to answer the questions out loud.

It's an interesting option few days before taking the oral board, although it does not surrogate a complete, detailed anesthesia book. It makes you be wary of important topics.
